

LysAAMet® and PROVAAL<sup>2</sup> products are amino acid supplements specifically designed to take full advantage of the recent advancements in ruminant nutrition. It is possible with NRC 2001 and CNCPS 6.5 biology to balance rations at 16% crude protein, or lower, without sacrificing milk yield or milk components. However, it is critical to utilize protein supplements that have concentrated, consistent, and balanced amino acid content for successful implementation of the low protein philosophy.

All Perdue AgriBusiness *Animal Nutrition* products utilize our unique technology to insure a concentrated and consistent supply of intestinally available amino acids. The product lineup varies in minimum levels of dRUP lysine and dRUP methionine which allows you to select the product that will result in a ration with amino acids balanced to optimize milk and milk component production.

	Crude Protein*	RUP	RUP DIG	dRUP*	dRUP Lysine*	dRUP Methionine*	
	94.2	94.2	94.3	83.6	8.3	5.4	
	AADVANTAGE <sup>®</sup>	80.1	90.5	90.7	65.7	5.8	0.7
	METAATEIN <sup>®</sup>	81.1	91.3	81.7	60.5	4.5	0.6
